

1

CLAIMS

1. Take-apart picnic grill with two hollow profiles to be disposed parallel to each other, which are connected by a plurality of rods (3,10) to form a grilling surface, **characterised in that** the hollow profiles are tubes (1,2), the diameter of one of which is sufficiently larger than the other to allow the tube with the smaller diameter to be inserted inside the tube with the larger diameter for transport purposes.
2. The picnic grill of claim 1, **characterised in that** the tube with the smaller diameter has an inner diameter which is sized in such a way as to accommodate all the other parts of the grill.
3. The picnic grill of claim 1 or 2, **characterised in that** one of the tubes has holes (4) in the side facing the other tube to accommodate rods (3) serving as the grilling surface, and in that in the top quarter of the circumference of the other tube facing the opposite tube there are slots (5) to match the number of holes for accommodating the other ends of the rods.
4. The picnic grill of claim 1 or 2, **characterised in that** one of tubes (1,2) has holes (4) in the side facing the other tube to accommodate the rods (3) which form the grilling surface, and in that in the other tube there is an unbroken longitudinal slit (18) on the side facing the first tube, in one edge of which there are slots (19) in which to place the other ends of rods (3).
5. The picnic grill of claim 1 or 2, **characterised in that** the top quarter of the circumference of both tubes is provided with slots (5) on the side facing the other tube.
6. The picnic grill of claim 1 or 2, **characterised in that** in both tubes there is an unbroken longitudinal slit (18) in the side facing the other tube, in one edge of which there are slots (19) in which to place rods (3).
7. The picnic grill of one of the preceding claims, **characterised in that** at the end of one of the tubes there is a notch (6) for cleaning the rods (3) which form the grilling surface.

1 8. The picnic grill of one of the preceding claims, **characterised in that**
the tube with the larger diameter can be sealed off at both ends with caps.

5 9. The picnic grill of one of claims 1 to 7, **characterised in that** the tube
with the larger diameter is sealed at one end and the other end is closed off
with a cap (14).

10 10. The picnic grill of one of the preceding claims, **characterised in that** all
the parts of the picnic grill according to the invention are made from
stainless steel.

15 11. The picnic grill of one of the preceding claims, **characterised in that**
the tubes (1,2) have a circle cylindrical cross section.
